

BECOME NESTED'S NEXT FELLOW!

nested

PARTNERS FOR
Andean Community Health

A team from Nested is going on a medical mission to Ecuador in July 2024 and we are seeking a Medical Mission Fellow to assist the team and our host, Partners for Andean Community Health (PACH), with logistical tasks, in-country support, and evaluation.

PRIOR TO THE TRIP

The fellow will receive mentoring from PACH and Nested team members and will help with trip fundraising, administration, procurement, advertising, event planning, and packing. They may also take on a project such as creating educational materials or designing a monitoring and evaluation tool.

DURING THE TRIP

In addition to participating, the fellow may execute their project and have a leadership role.

AFTER THE TRIP

The fellow will assist with closing out the trip, including sending thank you notes to donors.

To learn more and apply, email
info@nestedbaby.com and zac@pachecuador.org

BENEFITS

- Gain experience working with non-profits, serving as a project manager, and immersing yourself in another culture.
- Collaborate with international development professionals.
- Receive a detailed description of your role to use in future applications.

COST AND TIME COMMITMENT

- **Total Cost:** \$4,100, includes all in-country costs and a donation to Nested and PACH. Fellows are expected to cover flights to and from Ecuador as well as personal expenses.
- **Time Commitment:** Eight months with varying time commitment during each project phase.

ABOUT NESTED & PROJECT NIDO

Founded by Nidhi Reva, MPH, PA-C in 2017, Nested provides educational classes focused on preparing expectant families and providing families with life-saving skills to build healthy communities.

Every July, Nested organizes Project Nido, a medical mission to Chimborazo, Ecuador where we provide health outreach to indigenous communities. Nested collaborates with PACH, a US-based nonprofit that supports Hospital FIBUSPAM in Riobamba, Ecuador. PACH's mission is to foster sustainable health care systems and communities in Andean Ecuador by providing education, resources, and enduring solutions, along with global partners, to improve Andean community health and wellbeing.
